

---

Hi

Please see the following links to my reform proposals on:

- funding & governance of services (practically eliminating "vertical fiscal imbalance" and improving efficiency & effectiveness through enhanced choice/accountability/democracy): <http://davidthorp.net/australia>
  - with relevant customer-focused service reforms / initiatives embellished further here:
    - <http://davidthorp.net/human-services> (covering health, education, ageing & other community services)
    - <http://davidthorp.net/justice>
    - <http://davidthorp.net/transport-plan/sydney-metro-hst>
      - linked to a national economic, land-planning & affordable-housing strategy: <http://davidthorp.net/transport-plan/housing>
    - <http://davidthorp.net/transport-plan/pricing> - new opportunities necessitated by electric vehicles avoiding fuel excise.
- tax, superannuation & welfare: <http://davidthorp.net/super-tax> and,
- Treasury fiscal management: <http://davidthorp.net/economics/transformation>

Of possible further interest are my thoughts on:

- economic, fiscal & wages policies linked to Modern Monetary Theory and World Trade: <http://davidthorp.net/economics/mmt-world-trade>
- energy & environmental issues, including a pragmatic emissions-trading scheme: <http://davidthorp.net/energy-enviro>
- gambling (encouraging risk-seeking productivity investments & reducing social costs, with implications for taxation): <http://davidthorp.net/economics/it/gambling>

regards

David
