INDEX - Full index included at end of each Volume

INTRODUCTION

Volume 3 of Budget Paper No. 3 provides more detail for those agencies that were restructured following the March 2003 State election. It should be read in conjunction with Volumes 1 and 2 and the other Budget Papers.

High level aggregates reported for restructured agencies in Volumes 1 and 2 may not agree to those in Volume 3 as at the time of compiling the previous Volumes detailed financial information was not available. However, these changes have had no material impact on the Budget result.

ATTORNEY GENERAL AND MINISTER FOR THE ENVIRONMENT

ENVIRONMENT PROTECTION AUTHORITY

The Healthy Rivers Commission and its staff have moved from the Environment Protection Authority (EPA) to the Department of Infrastructure, Planning and Natural Resources.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

The EPA's objectives are to protect, maintain and restore the quality of the environment, having regard to the need to maintain ecologically sustainable development. It also seeks to reduce environmental risks to human health and to prevent degradation of the environment.

The EPA has been working on a number of significant environmental initiatives, including:

- the whole-of-government *Action for Air* initiative targeting smog and particle pollution;
- the Government's water reform package covering water quality management, river flows and a number of research studies;
- providing urban stormwater grants and working with councils to prepare Stormwater Management Plans;
- integrated regulation aimed at improving the environmental performance of industry;
- education programs to increase community awareness;
- working with the community to reduce waste;
- pesticides regulation and research;
- dangerous goods transport, hazardous substances, radiation control and contaminated land management;
- partnership with local councils for the Woodsmoke Reduction Program to reduce wood heater pollution;

- ♦ Smoky Vehicles Enforcement Program designed to control visible vehicle smoke emissions; and
- strategies for targeting excessive noise generated by industrial and neighbourhood areas, as well as road traffic.

STRATEGIC DIRECTIONS

The EPA's mission is to guide the community to achieve and maintain a healthy environment in a productive New South Wales.

The EPA has developed strategies involving innovative and targeted monitoring, regulation and enforcement as well as the use of economic mechanisms, education and the planning process.

Of particular importance have been recent legislative changes to the overall regulatory regime for environmental control in New South Wales. This has included the introduction of a system of load based licensing as a means of focusing on the total load of pollutants discharged into the environment rather than the concentration of pollutants in discharges. The system directly links the level of licence fee to the total load.

These strategies will assist the EPA in addressing:

- issues of waste generation, transport, disposal and management;
- increased pressures on the environment as a result of increased urban population and development;
- problems of maintaining and improving the health and sustainability of marine and freshwater environments; and
- the adverse impacts on the environment and public health of chemicals, hazardous substances and other contaminants.

2003-04 BUDGET

Total Expenses

The estimated accumulated cash balance of \$57.4 million in the Waste Fund has led to contributions from the EPA into the Waste Fund being suspended until the existing cash balance has been utilised. This has reduced the EPA's expenses in 2003-04 by more than \$40 million.

Major initiatives for 2003-04 include:

- ♦ \$0.6 million in expenditure on the maintenance of the air quality monitoring network; and
- ♦ a contribution of \$23.8 million to the Zoological Parks Board for various purposes, including the continuing comprehensive program of rebuilding and modernisation of facilities, research and public education.

Asset Acquisitions

Asset acquisitions in 2003-04 total \$3.2 million.

Capital expenditure of \$0.7 million will be incurred for the continuing upgrade of the air-quality monitoring network.

NATIONAL PARKS AND WILDLIFE SERVICE

The National Parks and Wildlife Service (NPWS), and the Department of Sport and Recreation are in the process of reviewing the administration and transfer of certain regional parks to the Department of Sport and Recreation.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

Total expenditure for 2002-03 is projected at \$341.3 million, including \$50.2 million for seasonal firefighting costs recoverable from the Treasury Managed Fund and natural disaster grants. Excluding the firefighting costs, the underlying total expenditure of \$291.1 million is an increase of 97.6 percent over the 1995-96 total expenditure of \$147.3 million.

This increase reflects the Government's continuing commitment to the environment and the increased responsibilities of the NPWS in conservation management, protection of threatened species, promotion of biodiversity and the management of the expanding areas of reserves.

Since 1995-96 the Government has declared over 320 new national parks and reserves, including additions to existing reserves.

As at 30 June 2003, more than 1,096,000 hectares of State forest and crown land in the north-east and south of New South Wales had been transferred to the NPWS as a result of the Government's forestry reform process. During 2002-03, the NPWS assumed control of 144,700 hectares of land as part of the Northern and Southern Regional Forestry Assessments, resulting in the declaration of a further 52 new reserves and additions to existing parks.

A total of \$14.5 million was spent in 2002-03 in establishing and managing new national parks in the upper and lower north-east regions of the State, and more than \$9.4 million in the south east regions.

Other commitments in recent years include implementing strategies for recovery and threat abatement of threatened species, and developing and implementing a State Biodiversity Strategy.

STRATEGIC DIRECTIONS

The objectives of the National Parks and Wildlife Service are to conserve, protect and manage the State's natural and cultural heritage and to provide opportunities for members of the public to enjoy, appreciate and support national parks, and the conservation of the State's heritage.

The NPWS has adopted three key conservation themes that reflect a shift in focus towards greater community involvement:

- facilitating conservation outside of the formal reserve system;
- managing the reserve system within a regional landscape context; and
- introducing agreed conservation criteria to target further improvement to the reserve system.

Within this framework, specific initiatives focus on strategic additions to the reserve system in under-represented bioregions, especially in western New South Wales, as well as enhancing the conservation value of reserves and improving visitor facilities and education programs. The initiatives also provide improved protection of biodiversity and cultural heritage and foster working with Aboriginal communities in joint management arrangements for culturally significant lands.

The NPWS also works with the general community to promote conservation efforts on privately owned lands.

2003-04 BUDGET

Total Expenses

Total expenses in 2003-04 are estimated at \$305.3 million. This is a decrease of \$36 million from the 2002-03 level, due to the unprecedented \$50.2 million incurred in 2002-03 on firefighting expenses. Excluding the impact of firefighting costs, the total expenditure is estimated to increase in 2003-04 by \$11.6 million.

Major expenditure areas include fire management, pest species management and the maintenance of essential infrastructure to facilitate management, access and enjoyment of the reserve system by the community. Emphasis will continue on community education and consultation to further engage stakeholders in the delivery of conservation programs.

Major new areas of expenditure include:

- ♦ additional funds for pest, animal and weed control;
- dedicated funds to establish and facilitate joint management of national parks with Aboriginal people from 2004-05;
- ♦ improvements in parks in the Blue Mountains and Central Coast areas from 2004-05.

The significant decrease in retained revenues from \$133.4 million in 2002-03 to \$61.2 million in 2003-04 is due mainly to the much lower estimate for firefighting costs recovered from the Treasury Managed Fund and natural disasters grants. In addition, in 2002-03, the NPWS received, free of charge, lands valued at \$22 million, from other government agencies. No transfers are anticipated in 2003-04.

Asset Acquisitions

Total asset acquisitions for 2003-04 are estimated at \$48.1 million, which is a decrease of \$4.3 million from the 2002-03 capital program, due mainly to the near completion of a number of large projects and the high level of land purchases in 2002-03, which is not expected to recur in 2003-04.

For 2003-04 new major capital works projects will focus on:

- ♦ further land acquisitions, including \$2 million for purchases under specific government programs (for example the Dunphy Wilderness Fund), purchasing high conservation lands in Western New South Wales, and further reservations in North East New South Wales;
- additional funds for establishing parks on lands purchased in 2002-03; and
- upgrade of water, sewerage and road infrastructure at the Perisher resort within Kosciuszko National Park.

In addition, a number of projects are to commence in 2004-05 to work towards creating an unbroken chain of reserves stretching from the Victorian border, through the suburbs of Sydney, and on to the Hunter Valley.

MINISTRY OF ENERGY AND UTILITIES

The Ministry of Energy and Utilities (the Ministry) was expanded on 2 April 2003 to include the State Water and Town Water and Recycling functions from the former Department of Land and Water Conservation.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

Total expenditure for 2002-03 has been estimated at \$224.1 million. This includes the full year expenditure relating to the transferred State Water and Town Water and Recycling functions from the former Department of Land and Water Conservation on 2 April 2003.

The budget for grants and subsidies increased from \$80 million to \$144.4 million during 2002-03, due to the Country Towns Water Supply and Sewerage (CTWSS) Program being transferred to the Ministry as part of the Town Water and Recycling Branch.

In 2003-04, the budget for grants and subsidies increases to \$162.2 million. The increase of \$17.8 million is primarily due to:

- ♦ the Energy Accounts Payment Assistance Scheme (\$8.3 million) being transferred to the Ministry from the Department of Community Services;
- ♦ an increase in the Pensioner Energy Rebate Scheme of \$3.6 million, due to increasing pensioner numbers and normal escalation; and
- payments from the CTWSS Program increasing by \$4.1 million.

STRATEGIC DIRECTIONS

The Ministry of Energy and Utilities provides the Minister for Energy and Utilities with strategic policy, legislative and regulatory advice in relation to the State's energy sector, urban and rural water utilities, and related social programs. The Ministry is also responsible for bulk water delivery services in non-urban areas through State Water.

In collaboration with other government agencies, the energy industry, consumer interest groups, NSW water utilities and other stakeholders, the Ministry assists the Government in choosing and implementing the best strategies for promoting the efficient, safe, reliable and ecologically sustainable supply and use of energy and water services. The Ministry also collaborates to develop and implement appropriate frameworks to improve the performance of the energy and water industries.

The Ministry is focused on ongoing competition reform of the State's natural gas and electricity markets, the sustainable use of energy and water, integrated water cycle management, safety, and supply reliability.

In particular, the Ministry provides the following services:

- ♦ policy advice on the future directions of energy and water in New South Wales;
- administration of regulatory frameworks that facilitate the operation of safe, reliable, technically efficient and environmentally responsible energy and water utility networks;
- management of social and other funding programs, including energy rebates, the Energy Accounts Payment Assistance Scheme, and the CTWSS Program;
- a single, integrated bulk water delivery service (State Water) covering asset management, water delivery and commercial management; and
- monitoring water utility performance in non-urban New South Wales, including audit, benchmarking and statewide reporting.

In addition, the Ministry will:

- continue to monitor the ongoing effectiveness of full retail competition for gas and electricity;
- monitor the performance and compliance of the NSW water utility industry's progress towards meeting Council of Australian Governments and National Competition Policy commitments;
- enhance Government and private sector understanding of the State's energy reserves, future demand and supply scenarios, and development opportunities through the Statement of System Opportunities;

- in conjunction with Treasury advise the Minister on policy issues raised at the National Electricity Market Ministers Forum, and actively contribute to the Ministerial Council on Energy;
- monitor and refine the electricity retailer greenhouse benchmark penalties scheme;
- ♦ implement Integrated Water Cycle Management to assist non-urban water utilities implement sustainable planning activities; and
- further improve asset management planning to ensure State Water's infrastructure performs in accordance with agreed levels of service at minimum whole of life cost.

2003-04 BUDGET

Total Expenses

Total expenses in 2003-04 for the Ministry of Energy and Utilities are estimated at \$242.8 million.

Major expenditures include:

- ♦ \$68.1 million towards the delivery of water supply and sewerage projects in country towns;
- ♦ \$83.7 million for pensioner energy and electricity life support rebates;
- ♦ \$8.3 million for the Energy Accounts Payment Assistance program; and
- ♦ \$70.2 million for operating, maintenance, metering and other expenditures in delivering bulk water to rural and regional customers.

Asset Acquisitions

Total asset acquisitions in 2003-04 are estimated at \$24.8 million. Major acquisitions include:

- ♦ \$1.5 million for building works at various dams sites;
- ♦ \$6.1 million for flood security and upgrade works at Blowering, Burrendong, Chaffey, Copeton, Keepit and Wyangala dams;
- \$0.4 million for essential works on redundant dams;

- ♦ \$5 million to rehabilitate river structures;
- \$4 million to undertake periodic maintenance programs at major storages;
- ♦ \$3.6 million to upgrade Warren and Gunningbar weirs on the Macquarie River to ensure efficient supplies for stock, domestic and irrigation users and town water to Nyngan and Cobar; and
- ♦ \$3 million towards the development of a Total Asset Management Plan for water infrastructure.

DEPARTMENT OF INFRASTRUCTURE, PLANNING AND NATURAL RESOURCES

The establishment of the Department of Infrastructure, Planning and Natural Resources was announced on 29 May 2003 to improve land use, infrastructure and transport planning, and natural resource management in New South Wales. The new Department combines many of the functions of the previous Departments of Planning and Land and Water Conservation, and incorporates the planning functions of the Department of Transport. Commercial and service elements of the previous departments were relocated to the Department of Lands and the Ministry of Energy and Utilities to ensure a focus on an integrated framework for natural resource management and land use planning. The new Department legally commenced from 1 July 2003.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

The budget year 2003-04 will represent a time of consolidation and refocus to achieve the Government's aims to improve NSW's economic performance and drive environmental sustainability through better management of natural resources and streamlining of NSW planning systems. This will involve actions such as providing incentive funding to support local reforms to native vegetation, fast tracking the allocation of funds to catchment organisations, and overhauling service provision.

The outcome is to ultimately reduce the cost of administration and redirect more funds to communities and farmers. The expenditure trends reflect these objectives. Total expenditures will initially increase to \$552.8 million in 2003-04 from \$537.7 million in 2002-03 as major work is undertaken to reduce backlogs, create new management arrangements for natural resources, improve systems and data and to merge the functions of the two former Departments.

STRATEGIC DIRECTIONS

The objectives of the new Department are to:

- better link natural resource management and urban development, particularly in coastal areas;
- simplify decision making, policy and regulation;
- improve service levels to communities, local government and farmers by simplifying applications and approvals;
- reduce the costs of administration to enable resources to be redirected to service delivery; and
- better link vital infrastructure such as transport and other facilities and services to the needs of communities now and in the future.

Priorities for the new Department include:

- increasing the involvement of the community in land use and natural resource decision-making;
- strengthening catchment management processes;
- implementing native vegetation reform;
- a comprehensive plan for the Salinity Reforestation project;
- commence water sharing plans and the new water licensing system;
- a strategic approach to urban water efficiency and conservation;
- enhanced governance arrangements and the efficient allocation of funds to communities;
- simplify the planning system;
- linking strategic transport decisions to meet government priorities;
- better management of coastal development; and
- co-ordination and strategic planning for major infrastructure development.

The Department of Infrastructure, Planning and Natural Resources will work towards a better balance between the environmental, economic and social needs of our communities and natural resources, with the ultimate aim of achieving sustainability of our natural resources and environments.

2003-04 BUDGET

Total Expenses

Total expenses in 2003-04 are estimated at \$552.8 million. A major part of this expenditure and that of future years will be directed towards a better integration of natural resource management and balanced and sustainable development. The integration of the vital areas of infrastructure, planning and natural resources will deliver infrastructure and policy that aligns with the changes that are taking place in the community.

Key initiatives that are ongoing or commencing in 2003-04 will be expenditure, in some cases spread across several agencies, of \$64.7 million over four years to meet implementation costs of the *Water Management Act 2000*; \$52 million towards the implementation of the NSW Salinity Strategy program over four years; \$44.4 million as the State's share of operating costs and works programs for irrigation areas in 2003-04 with similar ongoing expenditure; \$2.5 million in 2003-04 as part of a \$5 million Aboriginal Water Trust to assist the Aboriginal community in the development of water-based farming and aquaculture enterprises; \$13.7 million for the Coastal Protection Package and Area Assistance Scheme grants; substantial support for local government in the areas of coastal bikeways, floodplain management, estuary and coastal management, with particular support for improvement to Lake Illawarra, Lake Macquarie, planning in Kosciuszko National Park and Georges River.

Expenditure on the Salinity Strategy is recognised as part of New South Wales' contribution of \$198 million to the \$396 million National Action Plan on Salinity and Water Quality ('NAP'), which is a joint State/Commonwealth program. In addition, a new Natural Heritage Trust program between the State and the Commonwealth will commence in 2003-04 to direct substantial funding through the catchments to address New South Wales' most pressing natural resource management problems. In consultation with the Commonwealth, a substantial proportion of both Natural Heritage Trust and the NAP funding will be allocated on a global basis to strengthen the catchments to enable them to prepare investment strategies in consultation with local communities. A prime example is the \$120 million program over 4 years for native vegetation management incentives which will create a new model of sustainability.

Funding has been provided to facilitate the refocussing of the new Department and to bring about changes. Process and procedures will be simplified to improve service delivery to communities, local government, farmers and other stakeholders. Additional work will be undertaken to bring standards covering planning, water management and native vegetation up to a level where they would support a future devolution of approval powers for routine projects to authorities and entities closer to the end-users. This additional expenditure in 2003-04 will result in a lower cost structure going forward.

Asset Acquisitions

Total asset acquisitions in 2003-04 are estimated at \$18.1 million, which includes expenditure on building infrastructure works at Dubbo, Wellington and Bridge St Sydney and coastal land acquisitions. Increased funding will be directed at advancing electronic information systems.

DEPARTMENT OF LANDS

The Department of Lands comprises Crown Estate Management, Soil Conservation Service, Native Title and Aboriginal Land Claims Units and Land and Property Information. Land and Property Information is reported separately in Budget Paper No.3 Volume 2.

The Department's role covers the sustainable management of public lands, the provision of spatial information and the provision of land and property related information, including the registration of ownership in land.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

The Department of Lands is focussing on unifying its various business units (Land and Property Information, Crown Lands and Soil Services) under the one umbrella agency. Two separate programs have been retained for the Crown Estate and the Soil Conservation Service. Within those programs achieving efficiency improvements and commercial opportunities will continue to be a priority.

STRATEGIC DIRECTIONS

There are opportunities to manage the Crown Estate in a more efficient, effective and sustainable way through a public trading enterprise framework. The Department of Lands will concentrate on identifying commercial opportunities that are contained within its stewardship while managing and scoping community service programs.

2003-04 BUDGET

Total Expenses

Total expenses for 2003-04 are \$56.3 million. This includes \$28.7 million for the maintenance and management of Crown Lands, \$14.3 million for soil conservation activity and \$13.2 million paid to Land and Property Information to continue community service programs such as maintenance of topographical data, survey marks, aerial photography and the Geographic Names Board.

An additional \$1 million has been provided in 2003-04 for bushfire hazard reduction and weed and pest management on Crown Land.

Asset Acquisitions

The capital program is \$1.3 million. This provides for the continued development of the Land Direct information system and minor works.

DEPARTMENT OF INFRASTRUCTURE, PLANNING AND NATURAL RESOURCES

1 Environmental Planning

1.1 Planning Systems and Policy Development

Program Objective(s):

To set the strategic direction for land use management and infrastructure for communities across New South Wales. Provide advice on policy and strategy for key issues at a regional and statewide level. Co-ordinate the timely delivery of major whole-of-government infrastructure projects including planning for transport for changing communities.

Program Description:

Reform, develop and monitor planning and building systems. Whole-of-government co-ordination on all aspects of planning and related environmental, economic and human service issues. Develop State Environmental Planning Policies, Regional Environmental Plans and other planning policies and strategies. Provide a strategic framework for government investment in all modes of passenger and freight transport. Evaluate transport infrastructure and service proposals and projects. Manage demand for transport infrastructure, in participation with public and private sector agencies.

1 Environmental Planning

1.2 Planning Systems and Policy Delivery

<u>Program Objective(s)</u>: To facilitate improved economic performance, environmental sustainability and quality of life for New South Wales through better

planning policies, programs and improved land use management.

<u>Program Description</u>: Strategic and project level environmental impact assessment.

Implement whole-of-government initiatives for major development and infrastructure projects. Consider selected Local Environmental Plans to ensure consistency with a statewide strategic framework. Implement place-based programs that create quality communities and deliver economic, social and environmental benefits. Develop active partnerships with local government, other State agencies, business and the wider community. Provide best practice specialist services to stakeholders and the community. Manage grants programs that provide financial incentives to create quality communities in urban and

regional New South Wales.

DEPARTMENT OF INFRASTRUCTURE, PLANNING AND NATURAL RESOURCES

2 Natural Resource Management

2.2 Catchment, Land and Vegetation

Program Objective(s): Effective, sustainable and integrated management of the State's soil,

land and vegetation resources.

<u>Program Description</u>: Monitoring of the State's soil, land and vegetation resources within

catchments. Assistance to catchment management groups. Management of vegetation clearing processes. Prevention of land degradation. Consult with the community to develop integrated strategies for soil, land and vegetation ecosystems and forestry plantations. Stimulate the establishment of an efficient, high technology and sustainable native timber industry and to promote the

sustainable management of private forests.

Protection and conservation of the soil resources of New South Wales by provision of a cost-effective conservation earthmoving and consultancy service. Set the industry standard for conservation earthworks design and construction. Provide a specialist consulting service in environmental protection and rehabilitation, resource planning and assessment, environmental engineering and training in soil conservation thus contributing to effective and sustainable use of the State's soil resources.

Program Description:

Commercial planning, design and construction services for soil conservation earthworks. Consultancy services in a broad range of areas for environmental protection and the prevention of land degradation. Soil operation works/maintenance of Hunter Valley Flood Mitigation Works, bushfire rehabilitation and recreational areas.

DEPARTMENT OF COMMERCE

The Department of Commerce has been created to support a climate that makes doing business in New South Wales simple, accessible and fair for employees, consumers and industry. A number of government services have been brought under one umbrella. The Department comprises the Office of Fair Trading, Office of Industrial Relations, Office of Best Practice Information Technology and Corporate Services, and Policy Development and Risk Management Services. The Office of Government Procurement and the Office of Government Business are also within the Department of Commerce but will operate on a commercial basis without direct budget funding.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

Total expenses for 2003-04 are estimated to be \$266.5 million. The restructure of Government agencies transferred the former Office of the Minister for Public Works and Services (OMPWS) to the Minister for Commerce (Policy Development and Risk Management Services) from 1 July 2003. The impact of the transfer is that the Office's 2002-03 revised numbers are reflected in the statements of the Minister for Public Works and Services, while budgeted amounts for 2003-04 are reflected within the statements of the Minister for Commerce. The transfer between the Ministers largely accounts for the increase in the Department of Commerce's total expenses in 2003-04.

Office of Fair Trading

Total expenses for 2003-04 (including the Consumer, Trader and Tenancy Tribunal) are estimated to be \$158.3 million compared to a revised 2002-03 figure of \$156.3 million. The increase in expenses is mainly due to the formation of the Home Building Service as a result of the Campbell Inquiry into building quality. This increase has been offset by a reduction from \$20 million to \$17.4 million in the grant paid to the Fair Trading Administration Corporation. The grant is provided to meet the deficit associated with the previous Statutory Insurance Scheme for residential building works that closed on 30 April 1997. Future liabilities of the scheme are expected to decline.

The decrease in recurrent grants to non-profit organisations in 2003-04 is due to the provision of a one-off Travel Compensation Fund donation to the Commonwealth Rescue Pack worth \$1.7 million in 2002-03.

Office of Industrial Relations

Total expenses for 2003-04 are \$21.1 million. This includes \$1.6 million for the continuation of the Office's efforts to improve efficiency and compliance with New South Wales industrial legislation in the clothing outworker industry.

Office of Best Practice Information Technology and Corporate Services

Total expenses for 2003-04 are expected to be \$62.4 million. This includes allocations for whole-of-government projects of \$5.6 million and \$10.3 million respectively for the Human Services Better Service Delivery project and the Online Business Licensing project. The Government Radio Network will receive an allocation of \$12.7 million, which is in addition to agency contributions for its operation. The Office will continue management of the NSW Government contributions to the Community Technology Centres program and the National Information Technology Centre of Excellence, in the amount of \$2.2 million and \$3 million respectively. Opportunities for efficiency and improvements in corporate services, especially through shared information technology, will be a priority for the Office.

Policy Development and Risk Management Services

Policy Development and Risk Management Services was funded under the Minister for Public Works and Services in 2002-03.

Total expenses for 2003-04 will be \$24.8 million. This is lower than the 2002-03 total expenses of \$30.2 million (see Budget Paper No. 3 Volume 2 19-21). The reductions are due to:

- the transfers of the asset and procurement policy functions to Treasury;
- a one-off increase in Parliament House maintenance expenditure in 2002-03;
 and
- the termination of seed funding for Parramatta Government Property Strategy.

STRATEGIC DIRECTIONS

Office of Fair Trading

The Office of Fair Trading works towards fairness in the marketplace. The Office will develop and maintain a policy framework which provides appropriate safeguards for consumers while minimising restrictions on business and traders. The Office encourages compliance with regulatory requirements through information and education for consumers and traders, compliance monitoring and enforcement, complaint handling and dispute resolution, and licensing registration and certification.

Office of Industrial Relations

The Office of Industrial Relations works towards productive workplace relations under New South Wales industrial laws. The Office seeks to ensure that employers and employees are informed of their rights and obligations.

The Office provides education and information to assist employers, especially those in small business, achieve compliance with industrial legislation and awards. It targets inspectorial services at industries where compliance may be low. Where necessary, the Office takes action through the courts, to either protect the rights of participants or to ensure the smooth operation of the industrial relations system.

Office of Best Practice Information Technology and Corporate Services

The Office of Best Practice Information Technology and Corporate Services has a focus on electronic government service delivery. It will also incorporate the Corporate Services Reform Unit to reflect a shared services focus on implementation of government-wide agendas for process improvement. The Office will continue its role in the assessment of business cases for government ICT projects and will be involved in monitoring the progress and implementation of large projects. The ultimate aim of e-government is to deliver accessible and secure electronic services that are supported by efficient and customer focused government business practices.

Policy Development and Risk Management Services

This area covers the development of operational policy and risk management for government to ensure the effective utilisation of resources and reduce government's risk exposure across its total procurement activities. The services include advice to agencies on procurement, risk management, total asset management, management of government-wide contracts and the provision of maintenance services for key heritage buildings.

2003-04 BUDGET

Total Expenses

Total expenses for 2003-04 are \$266.5 million which will be applied to:

- Office of Industrial Relations continuation of the Office's efforts to improve efficiency and compliance with NSW industrial legislation in the clothing outworker industry and targeted inspectorate activities as areas of major focus, the operation of Government and Related Employees Appeals Tribunal (GREAT) and Transport Appeals Board.
- ♦ Office of Fair Trading:
 - the operation of the Consumer, Trader and Tenancy Tribunal;
 - licensing of real estate agents, valuers, conveyancers and private employment agents and the registration of business names, co-operatives, associations and co-operative housing societies; and
 - operation of the new Home Building Service which will provide strategic direction for NSW builders and consumers on residential building matters;
- Office of Best Practice Information Technology and Corporate Services targeted use of information technology to improve service delivery including funding for the Online Licensing Project and Human Services Better Services Delivery Project; and
- Policy Development and Risk Management Services maintenance of significant government buildings and the provision to agencies of policy advice and procurement risk management services. Funding is also provided for stone work and heritage maintenance projects.

Asset Acquisitions

The 2003-04 asset acquisitions program is \$22.2 million. Major projects within this program are \$12.5 million to improve coverage and the mobile data network for the Government Radio Network, and \$3.2 million to amalgamate the Office of Fair Trading Call Centres into a single integrated, multi-channel contact centre.

OFFICE OF GOVERNMENT BUSINESS AND OFFICE OF GOVERNMENT PROCUREMENT

The Office of Government Business and Office of Government Procurement have been restructured from the former Department of Public Works and Services. Both offices operate on a commercial basis.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

StateFleet

StateFleet, a business unit of the Office of Government Procurement, manages the NSW Government leased motor vehicle fleet on behalf of the Crown. A policy decision has been taken to begin to replace the private sector financed fleet of leased vehicles with government-owned vehicles.

The previous lease arrangements operated under three tranches. Effective 1 July 2003, no new leases will be entered into as leases expire for tranches one and two motor vehicles. StateFleet will arrange to purchase replacement vehicles instead.

The major objective of the Crown purchasing the vehicles is improved value-for-money in that:

- the private sector is now unable to provide a tax-based structure resulting in a below TCorp cost of funds;
- perceived difficulties in the private sector introducing major efficiencies or cost savings to New South Wales through improved lease/fleet management given the experience and sound operational track record of the existing centralised lease management by StateFleet; and
- the high cost of transferring residual risk to the private sector was not justifiable when New South Wales had demonstrated in the operation of the existing arrangements that residual risk could be managed over time across the large number of vehicles.

STRATEGIC DIRECTIONS

The revised structure realigns the commercial services provided by the Department of Commerce into two discrete entities that will improve accessibility for clients, customers and the community and provide real value to the Government.

The Office of Government Business brings together the primarily contestable commercial services provided on a fee-for-service basis, while the Office of Government Procurement brings together the procurement functions and services as well as other functions which are mandated across the NSW Public Service.

The Central Corporate Services Unit forms part of the Office of Government Business to better reflect its commercial focus and a state and regional service group has been formed to better deliver regionally based services.

2003-04 BUDGET

Total Expenses

Total expenses of the Office of Government Business and the Office of Government Procurement are budgeted at \$443.6 million in 2003-04. Key expenditure items and initiatives include:

- the ongoing roll out of smartbuy which is the Government's strategy to achieve better value for money in the procurement of goods and services;
- the rationalisation and review of operating and shared services costs; and
- a review of products and service delivery to improve value for clients and government.

Asset Acquisitions

The Offices will spend \$226.9 million in 2003-04, mostly on information technology projects and the purchase of motor vehicles to replace vehicles for which leases have expired. Major projects included are information technology infrastructure (\$8.3m), Central Corporate Services Unit's information systems (\$3.5 million) and smartbuy (\$2.3m) which is a computerised procurement system.

1.4 Office of Best Practice Information Technology and Corporate Services

Program Objective(s): To enhance the cost-effective use of information and communications

technology within and between Government, industry and the community, and through shared services focus on the implementation

of Government-wide agendas for process improvement.

<u>Program Description</u>: Provision of a co-ordinated and integrated approach for the effective

use and integration of information and communications technology and shared services across Government, that improves service delivery to

the community and businesses.

Outputs:	Units	2000-01	2001-02	2002-03	2003-04
Government Radio Network (GRN) -

DEPARTMENT OF SPORT AND RECREATION

The Department of Sport and Recreation has been restructured to take responsibility for a number of urban parks including Centennial Park and Moore Park Trust, Parramatta Park Trust and a number of Regional Parks previously part of the National Parks and Wildlife Service. The transfers are currently in progress.

Subsequent to the Budget, the Minister has announced that Tourism NSW and the Department of Sport and Recreation will be merged to create the Department of Tourism, Sport and Recreation. The objective of the amalgamation is to achieve efficiencies across the two organisations, targeting the sharing of corporate services.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

The trend to reduce reliance on the Government subsidy for the Department's day-to-day operations will continue in 2003-04. With net operating costs similar to the previous year, a significant proportion of award and other CPI increases will be absorbed through a combination of cost savings and higher revenue from increased participation in programs and services provided by the Department.

Industry development was a major focus in 2002-03 as the sport and recreation industry was significantly affected by the public liability insurance situation.

Training sessions for the 'Its Your Business' program were conducted throughout New South Wales for sporting associations at the state and local levels. This resource provides directors with the necessary tools to interpret financial information, implement effective corporate governance systems, understand legal obligations, and analyse and manage risk.

The focus on water safety continued with several new projects undertaken. In collaboration with the Royal Life Saving Society, a drowning prevention campaign, aimed at new parents and care givers to be vigilant around water, was implemented through the network of community nurses and the Keep Watch Program. Research was also conducted with the Chinese community to determine attitudes and risk perceptions regarding water safety, its preferred communication mediums and its understanding of water safety signage.

The Department continued working collaboratively with other agencies and key community organisations to provide an integrated service to disadvantaged people and communities.

The decrease in total expenses in 2003-04 results from a reduction in funding provided to the Sport and Recreation Fund, the transfer of administered grants to the Sydney Olympic Park Authority and the payment of one-off grants to organisations in 2002-03.

One-off grants were paid to:

- Blacktown City Council for Blacktown Olympic Park;
- Wollongong Sportsground Trust; and
- ♦ Kogarah Council to upgrade Kogarah Oval.

STRATEGIC DIRECTIONS

The purpose of the Department of Sport and Recreation is to create opportunities and facilitate active involvement so that people benefit from participating in sport, recreation and physical activity.

Assuming responsibility for the urban parks will provide increased scope for the Department to achieve its new Corporate Plan for 2003-2007. The vision of the plan is for a community to use sport and recreation to improve its wellbeing: *more people, more active, more often*.

The key result areas and the focus for 2003-04 are:

- building community and industry capacity through working with a range of other agencies, local government and community organisations to strengthen communities through sport and recreation. Also, the Department will provide continued support for the development of sporting infrastructure in regional and rural New South Wales particularly through the Regional Sports Facility Program and the Capital Assistance Program;
- client driven services through developing and refining programs provided by the Department to cater for client needs and expectations;

- business viability through rolling out the new Customer Information Management System (CIMS) that will improve the Department's interaction with clients, provide consistency of information, and streamline administrative and accounting processes; and
- ♦ high performing management and workforce through introducing a staff performance management system that will ensure all staff are contributing to the outcomes of the corporate plan.

2003-04 BUDGET

Total Expenses

The key initiatives for 2003-04 are \$1.5 million to establish the NSW Soccer Foundation and \$1 million in additional support of Surf Life Saving NSW.

Major features of the Department's expenditure include:

- ◆ an allocation of \$31.8 million for sport and recreation programs co-ordinated by the Department's Regional Offices and programs provided at Centres and Academies of Sport and Recreation;
- ♦ \$15.3 million in payments from the Sport and Recreation Fund for the operation of sporting associations, sports development grants and sporting facility capital grants. This includes payments for the Capital Assistance Program (\$2.9 million), the Regional Sports Facility Program (\$2.4 million), Sports Development Program (\$2.7 million), Regional Academies of Sport (\$0.9 million), various Water Safety programs (\$2.7 million), Youth In Sport (\$0.3 million), Disabled Athlete Scholarships (\$0.1 million), the Country Athletes Scheme (\$0.2 million) and the Active Communities Grant Scheme (\$0.4 million);
- ♦ administered grant funding towards the operations of the NSW Institute of Sport (\$5.7 million) and the Parramatta Park Trust (\$1.1 million); and
- ♦ \$0.5 million for urban Regional Parks.

Asset Acquisitions

A total of \$11.2 million will be spent in 2003-04. The major components of the asset acquisition program are:

- ♦ \$4 million to upgrade facilities at the Sydney Academy of Sport and Recreation and the Berry, Lake Ainsworth and Jindabyne Sport and Recreation Centres:
- ◆ a further \$3.7 million for the continuation of the replacement of dining hall and kitchen facilities at the Point Wolstoncroft and Myuna Bay Sport and Recreation Centres;
- ♦ \$2.5 million for minor works projects at the Centres and Academies of Sport and Recreation; and
- \$0.8 million for projects at Regional Parks.

MINISTRY OF TRANSPORT

The role of the Ministry of Transport is to provide independent, considered policy advice and strategic, financial and budgetary coordination for the transport portfolio and general support for the Minister for Transport Services.

The Ministry will continue to play a lead role in strategic advice on bus and ferry operations, including management and reform of the school student and community transport services.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

During 2002-03 total expenses increased by \$210 million, from a budget estimate of \$2,279 million to \$2,489 million. This was mainly due to increases totalling \$150 million for CityRail and CountryLink services to improve the safety, security, reliability and cleanliness of the rail network. Additional funding was also provided for the State Transit Authority's bus and ferry services and for the Parramatta Rail Link project.

STRATEGIC DIRECTIONS

The Ministry of Transport has been created as part of reform of the Transport Portfolio. Details of the stages of reform are included on pages 21-1 to 21-3 of Budget Paper No. 3 - Volume 2.

Increased accountability and transparency at all levels of the transport system is an essential element in further improving the public transport system. From a structural perspective, the recent reforms are designed to separate policy from operations. The Ministry's success will be measured in the efficient, reliable, safe, clean and cost effective public transport solutions that meet the community's needs.

2003-04 BUDGET

Total Expenses

Total budgeted expenses in 2003-04 are \$2,488 million.

Details of key initiatives for the Ministry in 2003-04 are discussed in Budget Paper No. 3 - Volume 2. The following funding will be provided by the Ministry in 2003-04:

Rail Services

- ♦ the Ministry will provide \$959.2 million in 2003-04 in recurrent grants to fund CityRail and CountryLink rail services;
- ◆ capital grants to StateRail from the Ministry will be \$402.6 million in 2003-04, an increase of \$14 million on 2002-03 Budget. This includes \$119.4 million towards the Parramatta Rail Link project;
- ♦ \$285.5 million will be provided to support maintenance work on rail lines throughout rural New South Wales.

Bus, Ferry and Community Transport Services

- ♦ the Ministry will provide \$242 million to the State Transit Authority in 2003-04. This includes funding for the School Student Transport Scheme and other concessions:
- ◆ payments to private transport operators and community groups in 2003-04 are estimated at \$443.9 million. This covers School Student Transport Scheme payments for private operators (more details relating to the School Student Transport Scheme are included on pages 21-6 and 21-7 of Budget Paper No. 3 Volume 2), concessions for pensioners, transport services provided under the Community Transport Program and Home and Community Care Program, as well as subsidies for half-fare taxi transport for people unable to use public transport because of a severe and permanent disability.

Transport Infrastructure Improvement

- ♦ \$25 million will be spent in 2003-04 on continuing construction of infrastructure, interchanges and commuter facilities such as car parks. These costs are being funded from proceeds of the Parking Space Levy (PSL).
- ♦ The PSL will also be providing \$20.6 million in 2003-04 to meet the cost of bus stations on transitways.

MINISTRY OF TRANSPORT

1 Transport Policy and Strategy

1.1 Transport Policy and Strategy

Program Objective(s): To provide independent, considered policy advice and financial and

strategic co-ordination for the Transport Portfolio to improve transport

service outcomes for the people of New South Wales.

Program Description: Deliver to the Minister and Government sound, impartial and

independent advice on policy and related issues. Undertake strategic co-ordination of the Transport Budget allocation. Manage portfolio legislation and support the Minister in his statutory, Parliamentary, Cabinet and other roles. Co-ordinate the activities of portfolio agencies. Maintain strong working relationships with external and

other Government agencies.

MINISTRY OF TRANSPORT

2 Contracting and Regulating Transport Serivces

2.1 Contracting and Regulating Transport Services

Program Objective(s): To contract and regulate transport providers to provide high quality

passenger and freight transport services to the community.

<u>Program Description</u>: Develop and improve regulated standards and monitoring/auditing of

transport service providers. Provide efficient and effective regulation services for transport service providers. Contract and fund services from providers (e.g. State Rail Authority, State Transit Authority, private transport operators, Rail Infrastructure Corporation and freight providers) which would not otherwise be available at the current fare and/or service levels. Fund improvements to public transport. Provide direct funding to identified community groups and certain individuals to meet their particular transport service needs.

TREASURER AND MINISTER FOR STATE DEVELOPMENT

TREASURY

Treasury consists of the **Office of Financial Management** (OFM) and the **Office of State Revenue** (OSR). OFM serves the Treasurer and the Government by providing economic advice and advising on, and accounting for, the overall management of the State's finances. OSR administers and collects taxes, implements legislation relating to State revenue, makes the payment of various grants, subsidies, and rebates, and collects outstanding State debts.

In April, Treasury was restructured as part of organisational changes approved by Government. The asset and procurement policy functions of the former Department of Public Works and Services were transferred to Treasury.

The new functions taken over by Treasury were integrated into the Office of Financial Management.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

Treasury applies various strategies to ensure State financial and economic management outcomes. The strategies implemented within Treasury continue to contribute to key outcomes including maintenance of the State's AAA rating, strong growth in the State's Net Worth and maintenance of a strong revenue base.

Office of Financial Management

OFM seeks to promote the allocation of resources that increases the economic welfare of the community. It works across a range of key areas to ensure financial and economic management strategies are in place to achieve this outcome. Achievements in key strategic areas over the previous year are outlined below:

Enhanced Economic Development

 development of an economics based framework for addressing natural resource management issues and a balance between development and sustainability;

- ongoing progress in implementing Competition Policy has secured National Competition Policy tranche payments and contributed to a more competitive business environment; and
- ♦ sale of Power Coal, Pacific Power International and Tallawarra as part of the ongoing reform of the energy industry.

Effective Resource Allocation

- ongoing implementation of the Financial Management Framework including further development of Service and Resource Allocation Agreements (SRAAs) as the key vehicle for determining budget allocations;
- ♦ assistance with a number of Privately Financed Projects for infrastructure procurement. Projects included: New Schools Project; Cross City Tunnel; Western Sydney Orbital; and Alternative Waste Technologies; and
- ♦ advice on and implementation of arrangements for the restructure of Natural Resource agencies following acceptance of the structural reform proposals.

Transparent Financial Management

- development and implementation, for the March 2003 State election, of protocols for the costing of election commitments to clearly report the net impact on the State's finances;
- commencement of review and update of the Treasurer's Directions and associated guidelines for agencies; and
- negotiation of Statements of Corporate Intent with Government Businesses and SRAAs with selected agencies to provide greater specification of the outcomes to be achieved.

Strengthened State Finances

- implementation of the State Fiscal Strategy provided the framework for the implementation of the State's 2002-03 Budget and the development of the 2003-04 Budget, reaffirming NSW's AAA Credit Rating;
- preparation of the NSW case to the Commonwealth Grants Commission 5 year review of the methodology for funding; and
- ♦ provision of advice on mitigating the impact of events such as the HIH collapse on insurance availability including tort law reform and industry liaison.

Office of State Revenue

Ensuring Due Revenue

OSR has continued to invest in electronic service delivery to clients with a focus on Web Forms development, Electronic Document Returns and improvements in pay-roll tax processing. Specific funding was provided for compliance programs in 2002-03 for the purpose of increasing voluntary compliance and ensuring that our taxes are equitable. Further compliance initiatives are being introduced in 2003-04 to build on the programs already being applied.

Ensuring Eligible Payments

♦ OSR administers the First Home Owners Grant Scheme (FHOGS) and the Grain Freight Rebate Scheme (GFRS). During 2002-03 the number of FHOGS applications reduced by 32 percent compared to 2001-02. This reflected a tapering off of first homebuyer activity in the market. It is projected that there will be a further decrease in numbers in 2003-04. The GFRS was established for a 2 year period effective from 1 July 2001 and officially came to an end on 30 June 2003. There has also been an increase in activity in the management of Unclaimed Moneys due to the information being made available on the Web and an increase in compliance activity.

Effective Fine Enforcement

♦ The State Debt Recovery Office (SDRO) is now established within OSR. A concentrated effort is being made to ensure an efficient and effective relocation to Lithgow by March 2004. With the announced transfer of the Infringement Processing Bureau from NSW Police to OSR, effective from 1 October 2003, the opportunity exists to broaden SDRO's involvement in fine enforcement processing and achieve performance improvements.

During 2002-03 OSR focused attention on the identification and implementation of productivity initiatives to improve efficiency and meet the cost of wage increases. OSR will continue its efforts to improve efficiency through the implementation of its Shared Services Plan and commitment to business process improvement across all its programs.

STRATEGIC DIRECTIONS

Office of Financial Management

OFM's strategic management framework remains unchanged. The 2003-04 strategic initiatives will help promote the allocation of resources that increases the economic welfare of the community. These initiatives are:

Enhanced Economic Development

- participation on the national working group reviewing and advising Heads of Treasuries and Treasurers on debits tax abolition and the possibility of abolishing particular State business stamp duties, as specified in the Inter-governmental Agreement (IGA);
- continue implementation of energy reform including the review of options for management of electricity trading risks; and
- review of the Fire Service Levy within the context of ensuring a competitive tax and business environment.

Effective Resource Allocation

- ♦ continuing implementation of the Financial Management Framework for the General Government Sector with emphasis on Service and Resource Allocation Agreements to facilitate value for money programs and services;
- implementation of strategic capital reforms to improve capital investment and management to achieve improved resource utilisation;
- enhancement of capital project assessment and monitoring functions; and
- assistance with approved Privately Financed Projects including the Long Bay forensic and prison hospital project.

Transparent Financial Management

- review of the policy for monitoring the operation of Government Businesses;
 and
- review and amendment of State accounting policies to comply with the convergence of Australian and International accounting standards.

Strengthened State Finances

- pursuance of a fairer share of Commonwealth funding for New South Wales through a phased review of the Commonwealth Grants Commission's assessment methods, to influence the methods adopted for the 2004 Review for allocating Commonwealth funding between the States for the five years beginning 2004-05; and
- improvement in public sector risk management through reviews of Financial Assets Management and Electricity Trading Risk Management.

Office of State Revenue

OSR's strategic plan confirms the mission, vision and guiding principles of the Office while simultaneously outlining a set of goals, objectives and strategies that establish priorities and provide direction. OSR 2005 provides the framework for OSR's strategic direction. It is based on four business focus areas:

- ♦ Stronger Revenue Base provision of better management of government revenue through simplified legislation, effective compliance and client service strategies. Seeking to ensure equitable revenue administration by minimising the cost of collection and compliance and increasing service delivery to the clients. Key action programs planned include the development of a Client Service Strategy and further implementation of the Compliance Strategy.
- ♦ Skilled and Committed People maximise organisational capability by developing the skills and talent of our people, developing strategies that strengthen OSR's position as the leading revenue agency by attracting and retaining skilled people. The key action program under this focus area is continuation of the implementation of the People Plan.
- ♦ Powerful Systems and Processes use of technology to streamline business processes and be more responsive to client needs, promoting use of technology to develop efficient and convenient client service alternatives. The key action programs focus on the Information Management Strategy, Business Process Improvement and ISO accreditation and the relocation of the SDRO to Lithgow.
- ◆ Expanded Revenue Services provision of an increased whole-of-government approach to revenue administration for the benefit of the people of New South Wales. The successful transition of the Infringement Processing Bureau from NSW Police to OSR will be the primary objective under this focus area.

2003-04 BUDGET

Total Expenses

The estimated expenses for Treasury in 2003-04 are \$361.2 million. This includes First Home Owner Grant payments estimated to be \$231.4 million. Excluding First Home Owner grants, Treasury expenses are \$129.8 million and will be used for the following:

- ♦ \$37.8 million to increase the community's economic welfare through undertaking microeconomic reform, applying a Financial Management Framework that assists General Government agencies deliver value for money programs and services while promoting transparency in the use of State Budget resources and strengthening the Commercial Policy Framework;
- ♦ \$71.3 million to ensure effective and equitable collection of revenue from taxes, duties and other sources due to the State of New South Wales;
- ♦ \$5.3 million to ensure eligible applicants receive payments due under Commonwealth and State Government schemes; and
- ♦ \$15.4 million to ensure the effective and timely administration of the full range of fine enforcement activities for the benefit of people of New South Wales.

Asset Acquisitions

Office of Financial Management

OFM's allocation of \$0.4 million for 2003-04 will be used for general enhancements to existing computer systems and equipment upgrades.

Office of State Revenue

OSR's allocation for 2003-04 is \$8.1 million. The key programs planned include:

- fitting out the new State Debt Recovery Office (SDRO) in Lithgow. This will involve IT equipment, furniture and other equipment to ensure the Office has a smooth transition and continues to operate effectively;
- ◆ replace the existing computer fine enforcement system at SDRO to increase functionality and to improve efficiency in processing and collecting outstanding debt; and
- ongoing development in OSR's RECOUPS and associated systems which are
 the key revenue collection systems for the State. This maintenance will
 extend the useful life of the system and aid OSR to keep pace with changing
 business needs and processes.

DEPARTMENT OF STATE AND REGIONAL DEVELOPMENT

The Department of State and Regional Development provides expert advice and quality services to advance the economic development of both metropolitan and regional New South Wales.

During 2002-03, the Office of Western Sydney (formerly part of the Department of Information Technology and Management) was integrated as a branch of the Department.

EXPENDITURE TRENDS AND RECENT DEVELOPMENTS

During 2002-03, the Department assisted major investment projects across New South Wales with an estimated investment value of \$1,217 million and employment impact of over 5,518 jobs. An extensive range of innovative programs were undertaken including:

- the Australian Technology Showcase (ATS) continued to expand its promotion of innovative Australian technology businesses, announcing the new ATS Technology Demonstration program. This initiative provides an opportunity for businesses to demonstrate or trial innovative technology in partnership with a Government agency or the private sector. A further 49 innovative member technologies were admitted to the ATS during the year. 358 companies involved in the ATS have contributed to over \$330 million in export and domestic sales and secured over \$190 million from equity investors;
- the Department's post-Olympics business development program facilitated access to business opportunities related to the Beijing 2008 Olympic Games. Activities included a major workshop in Sydney for the Beijing Organising Committee for the Olympics and introducing Beijing construction companies to NSW architects, engineers and building product service providers. Support for NSW companies has resulted in early success in Olympic tenders and good prospects exist for further successes;
- the Rugby World Cup Business Program will provide opportunities to leverage business from the expected presence of significant numbers of international visitors in Sydney during the Cup period. During 2002-03, six country themed business networking events, including one in London, were held to help identify business investors/executives from participating countries who will be visiting Sydney during the Rugby World Cup;

- the Regional Business and Investment Tour linked providers of finance with regional firms seeking funds for business growth. 16 delegates from investment companies visited Goulburn, Wagga Wagga and Nowra in November 2002. In addition, the Regional Film Investment Tour, conducted in June 2003, showcased the North Coast as a location to shoot films and television commercials to ten production companies;
- ♦ 99 companies participated in 43 trade missions and market visits (including independent company visits) organised or supported by the Department to 21 overseas markets. These missions and market visits resulted in 123 new market entries and are projected to earn \$44 million in new export sales for the participating companies in the initial 12 months;
- investment projects attracted to regional New South Wales included the relocation of truck body manufacturer Herd Bars and Bodies from Sydney to Wollongong, National Ceramic Industries' ceramic tile manufacturing plant at Maitland, Salmat's 300 seat call centre at Wagga Wagga, the Sea Link logistics warehousing and cold storage facility development at Blayney, a distribution centre for Woolworth's at Wyong and the expansion and upgrade of Hydro Aluminium's smelter in Kurri Kurri;
- investment projects attracted to Sydney included a research and development centre for Taiwan Telecom, Unisys' regional shared services centre, UBS Warburg's Global technical support centre, and ABC Tissues' new manufacturing plant; and
- Office of Western Sydney initiatives included the Western Sydney Business Awards, the Western Sydney Information Technology Cluster and the Knowledge Economy Conference.

STRATEGIC DIRECTIONS

The Department's activities are encompassed in four strategies. These are:

- promoting investment;
- boosting exports;
- encouraging innovation; and
- improving the State's business climate.

2003-04 BUDGET

Total Expenses

The Department's estimated total expenses for 2003-04 are \$106 million. During 2003-04 the Department's initiatives will include:

- implementation of programs to assist the commercialisation of biotechnology and actively market and promote NSW biotechnology companies internationally at events such as Bio2004 and Medica in Dusselldorf;
- ♦ the Australian Technology Showcase which includes over 350 innovative NSW technologies and provides an extensive range of promotional activities;
- ◆ coordination of a comprehensive business program in conjunction with the staging of the Rugby World Cup 2003 in Australia. The program will focus on Sydney and the regional venues of Gosford and Wollongong;
- regional development assistance delivering programs and services specifically aimed at helping the establishment and growth of regional businesses.
 Funding has been provided to continue the New Market Expansion and Towns and Villages Futures Programs;
- small business development programs which support and assist people who are intending to start a business as well as those who are already in business. The Small Business Expansion and High Growth Business programs offer fast growing businesses the opportunity to access external support to assist innovation and growth;
- customised business assistance for Aboriginal people engaged in business or intending to start a business. Support will also be provided for indigenous community based enterprises to engage in organisational building, management skilling and business development; and
- implementation of the New Export Opportunities Program which aims to assist small and medium companies into export and/or new overseas markets through trade missions and market visits, export advisory services and access to information and networking support.

Asset Acquisitions

The Department's asset acquisition program for 2003-04 includes \$0.1 million for essential building works and the replacement of plant and equipment.

1 State Financial and Economic Management Strategy and Services

1.1 Increasing the Community's Economic Welfare

Outcome Objective(s):

Promote the allocation of resources that increases the economic welfare of the community. The key strategic areas are:

- enhanced economic development;
- effective resource allocation;
- transparent financial management; and
- strengthened State finances.

Strategies:

Contribute to the productivity and efficiency of the NSW economy by undertaking **microeconomic reform**, including:

- implementation of electricity trading risk management policy;
- oversight of electricity network pricing determinations for 2004;
- implementation of policies to address community insurance issues;
- review of the Fire Service Levy; and
- establishment of enhanced capital assessment and monitoring functions

Applying a **Financial Management Framework and Commercial Policy Framework** that assists agencies deliver value for money programs and services through:

- Service and Resource Allocation Agreement (SRAA) negotiation and integration into the Budget process;
- implementation of a strategic capital allocation reform program;
- convergence with international accounting standards; and
- review of Public Trading Enterprise monitoring policy.

Optimising **State balance sheet** structure, including efficient management of debt, unfunded superannuation and other liabilities through review of the management of financial assets.

Advocating and applying the State Fiscal Strategy:

- analysis of the long term sustainability of the State's fiscal strategy;
- review of State taxes as specified in the Inter-Government Agreement; and
- co-ordination for the NSW case for the 2004 Commonwealth Grants Commission (CGC) review.

2 Revenue Collection

2.1 Ensuring Due Revenue

Outcome Objective(s):

Ensure effective and equitable collection of revenue from taxes, duties and other sources due to the State of New South Wales.

Strategies:

Improve revenue administration and service delivery by:

- implementing the Stronger Revenue Base strategy aimed at enhancing revenue collection and adopting strategies to reduce the level of undetected revenue;
- developing and implementing Powerful Systems and Processes strategy by enhancing the quality of our core computer systems and business processes;
- enhancing our Client Services Strategy;
- developing our people through the Skilled and Committed People strategy; and
- implementing the Expanded Revenue Services strategy that will enhance OSR's competitiveness and efficiency in undertaking new functions.

3.2 Ensuring Eligible Payments

Outcome Objective(s): Ensure eligible applicants receive payments due under

Commonwealth/State Government schemes.

<u>Strategies</u>: Maximise efficiency and effectiveness of administration of payments consistent with the Commonwealth/State Governments' policy by:

- ensuring eligible home owners receive payments due under Commonwealth/State Government schemes;
- enhancing our Powerful Systems and Processes to ensure eligible claimants and parties for Unclaimed Money and Petroleum Subsidies receive their entitlements;
- ensuring education and awareness within the broader community of the eligibility criteria for grants and payments; and
- applying the Stronger Revenue Base strategy to implement an effective audit program to minimise the risks of ineligible persons receiving payments.

	Units	2000-01	2001-02	2002-03	2003-04

4 Fine Enforcement

4.1 Effective Fine Enforcement

Outcome Objective(s):

Ensure effective and timely fine enforcement services which contribute to a higher level of compliance with the law.

Strategies:

Ensuring the effective and timely administration of the full range of fine enforcement activities for the benefit of the people of New South Wales by:

- enhancing Client and Stakeholder Relationships as part of the client service strategy;
- ensure effective and timely fine enforcement services which contribute to a higher level of compliance with the law; and
- providing fine enforcement services to State and Local Government Agencies.

	Units	2000-01	2001-02	2002-03	2003-04
Outcome Performance Estimates:					
Gross recoveries of fines and enforcement costs * Number of new fines enforced	\$m '000	90 729	92 696	87 494	87 500
Output Performance Estimates:					
Cost to collect \$100 fine enforcement revenue Time taken to close new fines enforced Fines closed to fines enforced	\$ Days %	n.a. 204 38	13.75 194 40	15.26 195 44	<15.00 190 48
Resources:	EFT	147	132	161	169

^{*} Gross Recoveries are directly related to the number of fines referred for enforcement. Gross recoveries for 2002-03 and 2003-04 have been significantly impacted by the decrease in referrals from the Police Infringement Processing Bureau.

Note: Program Statements have been replaced by Outcome Objectives in line with the Service and Resource Allocation Agreement implemented in 2001-02.

1 Development of the New South Wales Economy

1.1 Development of the New South Wales Economy

Program Objective(s): To advance the economic development of New South Wales by

securing sustainable economic and business growth in metropolitan

and regional areas.

<u>Program Description</u>: The provision of business information on Government policies applying

to industries. Marketing regional and metropolitan New South Wales as an investment location. Project facilitation and the provision of limited financial assistance. Provision of business counselling and consultancy assistance to small and medium enterprises. Assisting the development of enterprises. Promoting exports and co-ordinating public sector exports. Encouraging and promoting innovation. Acting as an advocate for business within Government.
