This statement is released in compliance with section 8 of the *Public Finance and Audit Act 1983*. This section requires the Treasurer by 31 December in each year, to publicly release a statement (the half-yearly review) containing:

- revised projections for the current financial year and an explanation of any significant variation in those revised projections from the original budget time projections
- revised forward estimates, for major aggregates, over 3 years
- the latest economic projections for the current financial year and an explanation of any significant variation from the budget time projections contained in the Budget Papers.

Section 8 also requires the half-yearly review is to be based on actual results as at the end of the previous October.

Also published with this statement are Uniform Presentation Framework (UPF) tables to meet Australian Loan Council reporting obligations.

Budget Paper No. 2 *Budget Statement* contains the full details of the 2010-11 Budget, as well as budget scope and other explanatory information. All financial statements presented are prepared in accordance with Australian Accounting Standard AASB 1049 *Whole of Government and General Government Sector Financial Reporting.*

Notes to using this report

The Budget year refers to 2010-11, while the forward estimates period refers to 2011-12, 2012-13 and 2013-14.

Figures in tables, charts and text have been rounded. Discrepancies between totals and sums of components reflect rounding. Percentage changes are based on unrounded estimates.

1. Overview

Economy

The global economic outlook remains positive and, as envisaged at Budget time, the transition from public to private demand is underway.

The main developments since Budget time have been a higher exchange rate, stronger than expected employment growth, higher than expected interest rates and a stronger recovery in agricultural production in New South Wales. However, consumers remain cautious in their spending, the broader housing market has not grown as fast as expected and recent floods may impact agricultural production and prices.

Revised Budget Forecasts

While the economic outlook remains broadly on track, Budget results are expected to be lower than previously forecast. The 2010-11 result reflects lower than expected revenues, while results in the later years are driven by higher expenses.

¹ Excluding the impact of the Australian Government's Nation Building – Economic Stimulus Plan and other factors which distort year to year comparisons.

Balance Sheet Indicators

Movements in the general government balance sheet since the 2010-11 Budget reflect lower than expected investment earnings during the 4th quarter of 2009-10 and changes in expected Budget outcomes².

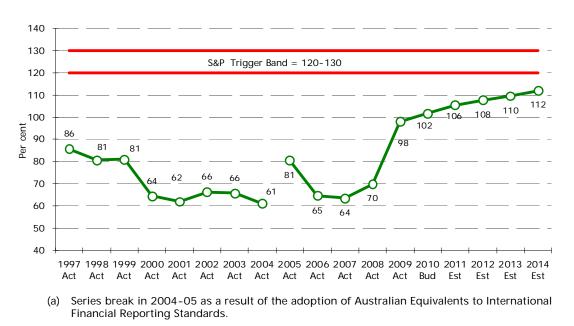

Movements in net debt are largely driven by the better than expected result in 2009-10 and the changes in the forecast Budget position over the next four years.

Half-Yearly Review	101.7	105.8	107.8	109.6	112.0	

² Net financial liabilities for 2010 and 2011 are also higher as a result of using a lower discount rate to value unfunded superannuation liabilities in line with accounting standards. Changes in discount rates do not impact on the underlying financial position of the State.

Standard and Poor's Metric

In line with weaker financial aggregates, the key metric used by the Standard and Poor's rating agency is expected to increase compared with estimates at Budget time.

Non-financial public sector: Net Debt and Unfunded Superannuation Liabilities as a share of total revenue

In accordance with normal budget practice, the estimates do not include the impact of potential business asset transactions such as WSN Environmental Solutions and divestments arising from the Government's Energy Reform Strategy.

THIS PAGE LEFT BLANK INTENTIONALLY.

2.1 2010-11 Budget Result

The Budget result for 2010-11 is forecast to be a surplus of \$167 million, \$606 million lower than the Budget time estimate.

Table 2.1: General Government Sector Operating Statement (cont)

Revenues

Total revenue in 2010-11 is estimated to be \$56.5 billion, which is \$1.1 billion or 2 per cent lower than the Budget estimate. The main changes are:

2010-11 revenue	Variance from Budget	Main reasons why
Taxation revenue	\$267million lower	Downward revision to transfer duty of \$274 million, or 6.8 per cent. Year-to-date collections are below expectations suggesting a greater than expected impact of recent interest rate increases on market participants.
		Minor downward revisions to motor vehicle stamp duty (-\$16 million), totalisator revenue (-\$14 million), the waste disposal levy (-\$18 million), and fees for the government guarantee of debt (-\$55 million).
		These are partially offset by upward revisions to payroll tax (\$66 million) reflecting stronger than expected employment growth, vehicle weight tax (\$39 million) and the bushfire services levy (\$40 million).
General purpose payments from the Australian Government	\$472 million lower	GST revenue in 2010-11 has been revised down by \$437 million reflecting revisions to the GST pool by the Australian Government and an adjustment for the overpayment of GST to the States in 2009-10.
National partnership (NP) payments	\$136 million lower	The reduction is primarily due to changes in the timing of NP payments. Road funding is projected to be \$211 million below budget following payments by the Australian Government in June rather than July 2010. Funds for the Holbrook Bypass on the Hume Highway accounted for the bulk of this timing shift (\$202 million). The revised timing of these payments has minimal impact on capital spending as the Holbrook project will be delivered over 3 years.
		The reduction in road grants was partially offset by a \$42 million increase in funding under the National Health and Hospital Network Agreement. This amount was originally expected in June 2010, but was paid in July following the signing of the NP.

2010-11 revenue	Variance from Budget	Main reasons why
Fines, fees and other revenues	\$292 million lower	The recent appreciation of the Australian dollar has contributed to a reduction in royalties revenues (\$332 million).
		Projected fines revenue has been revised down (\$97 million) following delays in the installation of safety and red light cameras. Infringements issued per camera have also been lower than expected as a result of safety awareness programs included in the Road Toll Response package.
		Offsetting these reductions are increases in revenues of the Crown Finance Entity (\$54 million) and other Roads and Traffic Authority revenues (\$31 million).

Total Tax Revenue	19,129	20,194	19,927	21,320	22,236	23,592

Expenses

Total expenses are estimated to be \$56.4 billion in 2010-11, which is \$527 million or 1 per cent lower than the budget estimate of \$56.9 billion. The major expense reductions include:

2010-11 expenses	Variance from Budget	Main reasons why
Transport NSW	\$350 million lower	A budgeted payment of \$350 million for the South West Rail Link was brought forward and paid in 2009-10.
NSW Self-Insurance Corporation	\$102 million lower	The reduction in outstanding workers compensation liabilities following a revision to the assumptions underlying the actuarial model (\$136 million) and favourable claims experience on the public liabilities portfolio (\$66 million). These reductions are partially offset by increases in NSW Police Death and Disability costs (\$75 million) and higher costs associated with the Home Warranty Insurance Scheme (\$24 million).
Drought related provisions	\$64 million lower	Revised estimate for drought-related works and assistance as New South Wales moves out of drought.

2.2 Forward Estimates

The revised results for 2011-12 onwards reflects a number of offsetting changes to individual revenues, expenditure increases in key service delivery agencies, cost pressures in areas such as insurance and flow on impacts to financing costs.

Table 2.3:	Budget Results
------------	----------------

	2010-11 \$m	2011-12 \$m	2012-13 \$m	2013-14 \$m
Budget Time	773	885	863	628
Half-Yearly Review	167	176	432	129
Change	-606	-709	-431	-499

Total revenues across the forward estimates are largely in line with Budget forecasts. However, this outcome masks a number of significant changes in individual revenues. The major changes include:

- GST payments are below Budget due to downward revisions to the GST pool in line with Australian Government forecasts
- lower transfer duty across all years reflecting the impact of a more subdued property market
- higher mining royalties, particularly in 2012-13 and 2013-14, reflecting revised forecasts for coal prices. The exchange rate is assumed to retrace slightly from recent high levels, and with Newcastle Port reaching capacity and international coal prices firming, royalties are expected to average \$120 million higher over the forward estimates than in the Budget
- higher payroll tax due to stronger than expected employment growth.

Headline expenses growth over the 4 years to 2013-14 is expected to be 3.7 per cent per annum compared to Budget projections of 3.4 per cent. On an adjusted basis³, expenses are expected to grow by 5.1 per cent per annum or 0.4 per cent higher than forecast at Budget time.

The most significant post-Budget changes in expenses relate to:

- higher insurance expenses largely due to actuarial assessments of liabilities associated with the Police Death and Disability scheme
- timing changes in capital grants to the rail sector. With the expected rapid growth in capital expenditure in the public transport sector, the Budget will, to the extent possible, prepay contributions to the sector to ease the burden on the Budget in future years.
- slower than expected progress on the achievement of some agency savings plans
- higher interest expenses consistent with movements in the Budget results and a higher interest rate environment.

Since the Budget the Government has also announced spending of \$2 billion for disability services over the next five years.

³ Excluding the impact of the Australian Government's Nation Building – Economic Stimulus Plan and other factors which distort year to year comparisons.

2.3 Total State Infrastructure Investment

Over the four years to 2013-14, State infrastructure investment is expected to total \$62.4 billion. This is an increase of \$247 million or 0.4 per cent over the 2010-11 Budget estimate. A \$607 million increase in the general government sector is offset by a \$361 million decrease in the public trading enterprise sector.

Table 2.5: State Infrastructure Investment Summary

(a) Total State infrastructure investment may not total general government and PTE sector infrastructure investment because of inter-sectoral purchases which cancel out on consolidation. Total State in this table excludes the public financial enterprise sector.

General Government

In 2010-11, capital expenditure is expected to total \$7.9 billion, which is \$217 million above the Budget estimate. The main changes in the program are:

2010-11 capex	Variance from Budget	Main reasons why
Department of Education and Training	\$103 million higher	Mainly rollover of unspent funds from 2009-10 under Australian Government funded programs: \$36 million for Digital Educational Revolution, Connected Classrooms, Learning Management and Business Reform; and \$51 million for Trade Training Centres; and other measures (\$16 million).
Department of Health	\$26 million higher	Increased funding for a range of priority health projects (\$16 million) and increases in Australian Government funding for Digital Regions Initiative and National Partnership Implementation Plans (\$10 million).
New South Wales Fire Brigades and NSW Police Force	\$21 million higher	Bringing forward the relocation of police operational facilities from Zetland to Potts Hill (\$5 million) and roll-over of spending from 2009-10 for purchase of fire engines and vehicles (\$16 million).

2010-11 capex	Variance from Budget	Main reasons why
Department of Transport	\$15 million higher	Increased expenditure on purchase of buses for State Transit and private operators under finance lease arrangements.

In the four years to 2013-14, general government sector capital expenditure is expected to total \$26.5 billion. This is an increase of \$607 million or 2.3 per cent over the Budget estimate.

The main changes contributing to the four year increase in addition to those listed above are:

- \$315 million increase in the Roads and Traffic Authority capital program comprising mainly of additional Australian Government funding for the Great Western Highway (\$197 million) and the Road Toll Response Package originally budgeted as recurrent (\$143 million), partially offset by other minor adjustments, and
- a further \$46 million additional expenditure on various health projects.

Public Trading Enterprises

In the four years to 2013-14, capital expenditure in the public trading enterprise sector is expected to total \$36 billion. This is a decrease of \$361 million or 1 per cent compared with the estimate at Budget time.

Four year capex	Variance since Budget	Main reasons why
Transport sector	\$505 million higher	Reflects spending on the Parramatta to Epping Rail Link (PERL) brought forward from the latter years of the 10-year Metropolitan Transport Plan (as announced in August 2010); and timing changes on the South West Rail Link consistent with announced project delivery in 2016. Also includes changes to the accounting treatment of the Barangaroo pedestrian link to reclassify this item as a grant to a PTE.
Electricity sector	\$621 million lower	Reductions due to Delta Electricity not needing to proceed with planned rail upgrade and coal unloader works. EnergyAustralia / Integral Energy / Country Energy / TransGrid have reprofiled their capital expenditure to reflect operational delays.
Water sector	\$283 million lower	Reduction mainly due to the Government's decision to cancel the Tillegra Dam project (announced on 28 November 2010). Some offsetting increases in dam safety spending in line with NSW Dam Safety Committee standards.

2.4 Balance Sheet

The following table provides a comparison of the latest projections for the general government balance sheet compared with those estimated in the 2010-11 Budget. The key aggregates are net financial liabilities and net debt.

Net Financial Liabilities ^(a)	52,884	49,219	52,670	3,451	52,470

Table 2.6: General Government Sector Balance Sheet

Net Financial Liabilities

Net financial liabilities are projected to be \$52.7 billion in June 2011, \$3.5 billion higher than the budget estimate. The principal reason for this is an increase in superannuation liabilities following lower than expected investment returns in the 4th quarter of 2009-10 and the use of a lower discount rate for valuing unfunded superannuation liabilities.⁴

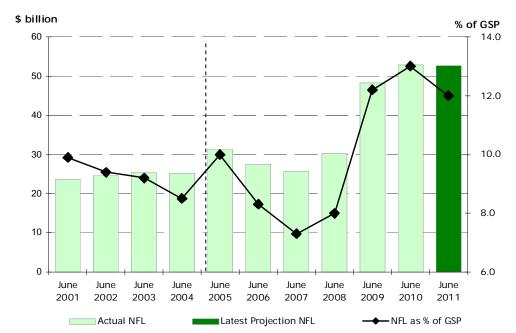

Chart 2.1: General Government Net Financial Liabilities

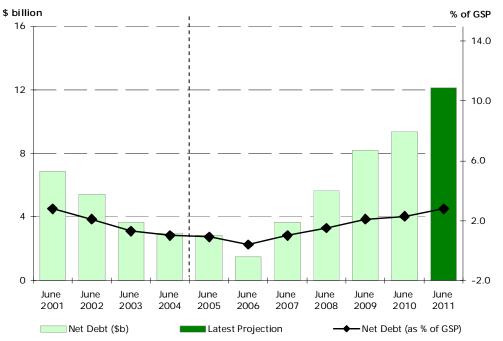

Net Debt

Net Debt is projected to be \$12.2 billion at 30 June 2011, \$75 million lower than the Budget estimate. This principally reflects a better than expected outcome in 2009-10.

⁽a) Series break in 2004-05 as a result of the adoption of Australian Equivalents to International Financial Reporting Standards.

⁴ Net financial liabilities for 2010 and 2011 are also higher as a result of using a lower discount rate to value unfunded superannuation liabilities in line with accounting standards. Changes in discount rates do not impact on the underlying financial position of the State.

Chart 2.2: General Government Net Debt

(a) Series break in 2004-05 as a result of the adoption of Australian Equivalents to International Financial Reporting Standards.

(b) Net debt has been adjusted to exclude the impact of prepaid superannuation contributions and transactions of the General Government Liability Management Fund.

2.5 Cash Flow

The projected cash deficit of \$2.8 billion is \$1 billion higher than the Budget time estimate. The change in the cash result is driven by lower operating receipts and higher payments as well as higher capital expenditure and lower expected asset sales. The reduction of \$606 million in the Budget result is in line with the \$620 million reduction in net cash flows from operating activities.

Table 2.7: General Government Sector Cash Flow Statement

3. Economic Outlook

The economic outlook as envisaged at Budget time remains broadly on track. The global outlook remains supportive, while nationally the expected transition from stimulus led growth to a self-sustaining private sector recovery is underway. The main revisions since Budget time reflect a higher exchange rate, higher interest rates, stronger than expected employment growth and a stronger than expected recovery in agricultural production in New South Wales (although the extent of recent floods may impact production and prices).

NSW economic growth is expected to strengthen to 3¹/₄ per cent in 2010-11 and remain at that level in 2011-12. Solid household consumption, improving net exports, a strong farm sector recovery and a continued recovery in dwelling investment will drive growth in 2010-11. A stronger recovery in business investment is expected in 2011-12 but this is offset by lower public sector demand.

3.1 World Economy

The global economic recovery is continuing, although conditions remain uneven across regions and downside risks remain. While the global economy recovered faster than expected in 2010, growth is expected to moderate to around trend in 2011. Concerns have increased over the strength of the US recovery and the potential for renewed stress in Euro Area financial markets.

The recent recovery in most advanced economies is expected to moderate as inventory accumulation slows, fiscal stimulus is withdrawn and financial markets remain strained. High levels of excess capacity, ongoing household deleveraging and planned fiscal consolidation in some countries are also expected to restrain their recoveries. By contrast, a number of Australia's major trading partners in Asia continue to grow strongly, albeit at a more moderate and sustainable pace than earlier in the year.

Table 3.2: Evolution of IMF Forecasts for World Output

Date of forecast	World	Output	tput United States		Euro Area		Japan		China

(Per cent change, calendar year)

Source: IMF, World Economic Outlook (WEO) and updates released between April 2010 and October 2010.

Strong demand from emerging Asia is supporting high prices for Australia's non-rural commodity exports and supply disruptions in some countries have strengthened rural export prices. This has resulted in Australia's terms of trade lifting to a historically high level and adding substantially to domestic income. Nominal GDP growth, for example, increased by 9.6 per cent through the year to the September quarter 2010.

The sharp recovery in the terms of trade and the significant interest rate differential with most advanced economies have contributed to a stronger than expected appreciation of the exchange rate, which is now trading around post float highs with the US dollar.

Financial market conditions have improved since mid-2010 when sovereign risk concerns in Europe increased financial market volatility and risk aversion. However, the recent deterioration in the Irish fiscal and banking system situation, which saw it become the second Euro Area country to receive financial assistance, highlights the ongoing uncertainty in financial markets and the global economic outlook.

3.2 Australian Economy

The Australian economy has recovered strongly with recent growth at around trend. The transition from public demand and stimulus led growth to a self-sustaining private sector recovery appears to be occurring, although conditions are uneven across sectors. The timing of that transition will be affected by the commencement of major resource projects.

The Australian economy is expected to grow at an above-trend rate in 2010-11 and 2011-12, driven by strong growth in mining investment, rising commodity exports and the effects of the income boost flowing from the high level of the terms of trade.

New South Wales will benefit from these developments through higher incomes, increased interstate trade and thermal coal exports, but will continue to face headwinds from a high exchange rate and higher interest rates.

3.3 New South Wales Economy

NSW economic output (GSP) grew by 1.7 per cent in 2009-10, lower than the 2½ per cent expected in the Budget. This reflected slightly slower than expected growth in state final demand and a larger than expected drag from net exports. NSW GSP growth is expected to strengthen to an above trend pace of 3¼ per cent in 2010-11 and continue at that level in 2011-12. The small upward revision to 2010-11 GSP growth since the Budget reflects higher expected growth in household consumption and a stronger than expected recovery by the farm sector and commodity exports.

As shown in the chart below, NSW final demand recovered more strongly than the national average in 2009-10. Importantly, private sector demand contributed to growth in 2009-10 (although partly stimulus boosted), a trend which is expected to strengthen over the forecast period.

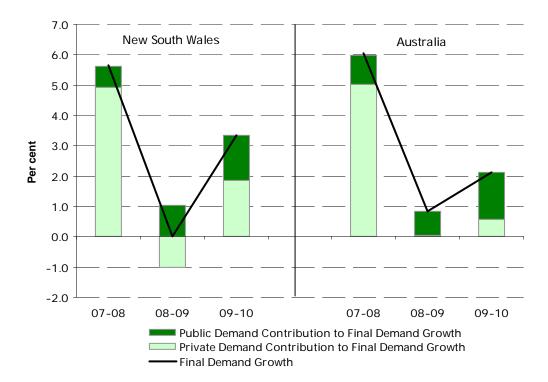

Chart 3.1: Contributions to Growth in Final Demand

Household consumption

Household consumption is expected to remain firm, reflecting stronger than expected employment and wage growth in 2010-11 and 2011-12. Consumption is expected to be supported by the income boost from the high terms of trade, recent increases in household wealth related to equity markets and house prices, improved purchasing power from a strong exchange rate and high levels of consumer confidence. But partially offsetting these factors will be higher interest rates and a cautious consumer resulting in higher savings and lower borrowings than in the past.

Dwelling investment

Dwelling investment increased by 2.9 per cent in 2009-10 and is expected to continue its recovery in 2010-11 and 2011-12 after a period of subdued activity. Nonetheless, the recovery in new construction is moderate by historical standards, particularly given the current historically high population growth supporting demand.

In the short term, activity should be supported by increases in multi-unit dwelling approvals and investor housing finance. This is despite an easing in the broader housing market where Sydney established house prices have moderated after earlier large increases and owner-occupier finance has slowed following the phasing out of Government initiatives and rising interest rates.

The dwelling investment outlook is underpinned by low rental vacancy rates, rising rents, strong population growth and low unemployment. However, while the official cash rate is around budget expectations, mortgage rates have risen further than expected. There is a risk of higher than expected interest rates ahead which would moderate housing construction activity.

Business investment

Business investment is expected to record modest gains in 2010-11, followed by stronger growth in 2011-12. Business surveys are reporting a return to average levels of capacity utilisation and improving business profits which support a positive investment outlook, despite commercial finance remaining subdued. Investment intentions are recovering but businesses remain cautious outside the mining sector.

Machinery and equipment investment is expected to improve following the temporary slowing related to the ending of tax concessions in December 2009. However, non-residential building activity is expected to remain subdued in 2010-11 as the return of education sector activity to normal levels (post stimulus) offsets an emerging improvement in commercial and industrial approvals.

Agricultural production

NSW agricultural production and rural exports are expected to recover strongly in 2010-11 after a drought affected 2009-10. ABARES has significantly revised up its forecast for NSW crop production due to average to above average rainfall. ABARES is forecasting winter crop production in New South Wales to increase by 120 per cent to its highest level on record and summer crop production to increase by 72 per cent. The recovery in agricultural production is expected to add around ¼ to ½ of a percentage point to GSP growth in 2010-11. However, a rain interrupted winter harvest has reduced crop quality and crop damage from locusts and recent flooding could negatively impact expected production.

Public demand

Public sector demand is expected to grow modestly in 2010-11 before detracting slightly from GSP growth in 2011-12 as stimulus capital programs slow, coinciding with a broad-based recovery in private demand.

Net Exports

Net Exports detracted a larger than expected 1.9 percentage points from GSP growth in 2009-10, mainly reflecting a strong rebound in merchandise imports. Forecasts for net exports in 2010-11 have been revised up reflecting stronger expected rural commodity exports. Rural exports are expected to recover in line with the strong farm sector recovery. Non-rural commodity exports are expected to strengthen, reflecting increased thermal coal export capacity and strong Asian demand over the forecast period. However, the high Australian dollar is expected to restrain growth in non-commodity exports.

Imports are expected to continue to grow strongly, reflecting the high exchange rate, solid consumer spending and improving business investment.

Employment growth

Reflecting the improved economy, employment in NSW grew by 1.2 per cent in 2009-10 and labour market conditions have continued to improve into 2010-11. Employment growth accelerated more than expected in the first five months of 2010-11, growing by 2.9 per cent compared to a year earlier (driven by full-time employment), while the unemployment rate has declined to an average of 5.2 per cent (after averaging 5.7 per cent in 2009-10). Leading indicators point to continued above-trend labour demand in the short term, although some suggest demand will then moderate from its current high levels.

NSW employment growth has been revised up and is expected to be $2\frac{1}{2}$ per cent in 2010-11 and $1\frac{3}{4}$ per cent in 2011-12, consistent with the above-trend outlook for economic output.

Unemployment rate

Reflecting the improved labour market conditions, the unemployment rate is expected to decline further than forecast at Budget time. However, solid growth in the working age population and higher workforce participation as the economy recovers will continue to moderate the decline in the unemployment rate.

Wage growth

Wage growth has picked up in line with the recent labour market improvement. NSW private sector wage growth has recovered to around its long-run average pace, while public sector wages continue to grow at a solid pace.

Wage growth is expected to pick up further over the forecast period as the labour market gradually tightens. However, the pressure on wages and inflation as the recovery proceeds is expected to be less than implied by the unemployment rate with broader measures of labour underutilisation indicating higher levels of spare capacity.

Consumer price inflation

Consumer price inflation is expected to remain contained within the RBA's 2-3 per cent target range over the forecast period. Underlying inflation pressures are expected to build as the Australian economy returns to full capacity and there is a risk that some NSW industries may face labour and capital constraints due to the rapid expansion in mining investment. If resource sector investment and national income gains exceed expectations an earlier re-emergence of capacity constraints and skill shortages could occur, putting upward pressure on wage growth and inflation.

Medium-term outlook

NSW output growth during the projection years (2012-13 and 2013-14) is unchanged from Budget time and is slightly above the long-term trend of 2³/₄ per cent. In keeping with the experience from previous cycles, this methodology assumes that after a period of below-trend growth the economy will experience a period of above-trend growth to return the economy to its potential level.

4. Uniform Financial Reporting

4.1 Uniform Presentation Tables

A Uniform Presentation Framework (UPF) for financial aggregates has been agreed by the Australian Loan Council. As part of the Framework, each jurisdiction is to publish a mid year report, i.e. a half-yearly review of the Budget, by the end of February each year. The UPF tables have been prepared consistent with the 2010-11 Budget, in accordance with Australian Accounting Standard AASB 1049 *Whole of Government and General Government Sector Financial Reporting.* This standard adopts a harmonised GFS-GAAP reporting basis. The main differences in reporting on an AASB1049 basis compared with a GFS basis are outlined on pages 9-4 to 9-8 of 2010-11 Budget Paper No.2 *Budget Statement.*

This UPF report includes operating statements, balance sheets and cash flow statements for the NSW general government sector, public non-financial corporation (PNFC) sector and non-financial public sector.

The Half-Yearly Review presents revised fiscal estimates for the current budget year and the three following years for the general government sector. In addition, revised estimates are presented for the PNFC sector and the non-financial public sector (i.e. a consolidation of the general government sector and the PNFC sector). These revised estimates take into account fiscal and economic developments since the Budget.

4.2 Loan Council Allocation

Table 4-13 presents the Budget time estimates of the State's Loan Council Allocation (LCA) for 2010-11 and a revised estimate taking into account recent fiscal and economic developments.

Overall, the estimated Loan Council Allocation deficit of \$7.4 billion for 2010-11 has increased and has been revised to a deficit of \$9.2 billion. The variance of \$1.8 billion since the 2010-11 Budget exceeds the tolerance limit of \$1.5 billion set by Loan Council. This tolerance limit is calculated as 2 per cent of cash receipts from operating activities for the non-financial public sector.

The variance in the tolerance limit is primarily due to a higher than budgeted cash deficit for the general government sector (\$1.0 billion) and for the public non-financial corporation sector (\$1.1 billion), partly offset by a \$0.4 billion estimated reduction in new finance leases.

Table 4.13: Loan Council Allocation Estimates^(a)

	2010-11	2010 -11
	Budget time	Half-Yearly
	Estimate	Estimate
	\$m	\$m
General government sector cash deficit/(surplus)	1,785	2,816
Public Non-financial Corporations sector cash deficit/(surplus)	4,616	5,704
Non-financial public sector cash deficit/(surplus) ^(b)	6,401	8,506
Acquisitions under finance leases and similar arrangements ^(c)	698	304
Equals: ABS GFS cash deficit/(surplus)	7,100	8,810
Vinus: Net cash flows from investments in financial assets for policy purposes ^(d)	(186)	(209)
Plus: Memorandum items ^(e)	96	136
Loan Council Allocation	7,382	9,155

(a) Cash surplus/deficits and finance leases are displayed with the opposite sign to that under which they are reported in cash flow statements. That is, a surplus is displayed as a negative number and vice versa.

(b) The non-financial public sector cash surplus/ (deficit) may not directly equate to the sum of the general government and public non-financial corporation cash deficits due to intersectoral transfers which are netted out.

(c) Finance leases are shown as they are deducted from the AASB 1049 cash surplus to derive the ABS GFS cash surplus.

(d) Net cash flows from investments in financial assets for policy purposes are displayed with the same sign as which they are reported in cash flow statements.

(e) Memorandum items are used to adjust the ABS deficit to include in LCAs certain transactions, such as operating leases that have many of the characteristics of public sector borrowings but do not constitute formal borrowings. They are also used, where appropriate, to deduct from the ABS deficit certain transactions that the Loan Council has agreed should not be included in LCAs – for example, the funding of more than employers' emerging costs under public sector superannuation schemes, or borrowings by entities such as statutory marketing authorities.

Privately Financed Projects

As confirmed at the 1997 Loan Council meeting, States are to report their full contingent exposure to

infrastructure projects with private sector involvement. Exposure is to be measured by the Government's

termination liabilities and disclosed as a footnote to, rather than a component, of LCAs.

2010-11 Contracts: None to be reported.
